Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/522,305	Applicant(s) FURUMI ET AL.	
	Examiner KEVIN HURLEY	Art Unit 3611	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by JP 5-64056.

JP 5-64056 (see Fig. 4) discloses an electric power steering apparatus comprising:

a steering wheel 6;

a rack shaft 3 to be connected to vehicle wheels, said rack shaft being connected to said steering wheel through a steering shaft 7 and a rack-and-pinion mechanism 5; and

two electric motors 14, 15 positioned adjacent and connected to said rack shaft through transmission mechanisms 16,10 and a ball screw 12, wherein the electric motors have respective motor shafts extending parallel to the rack shaft.

Allowable Subject Matter

3. Claims 5-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

4. Applicant's arguments filed 19 May 2008 have been fully considered but they are not persuasive.

Regarding claim 2, applicant has argued that JP 5-64056 does not disclose transmission mechanisms for the two electric motors nor does the reference disclose a single ball screw. The examiner disagrees. The broad term "transmission elements" encompasses the drive shaft 10 and electromagnetic clutch 16, as well as bearings 9 shown in JP 5-64056. Furthermore element 12 is a ball nut and element 11 are balls. Element 10 includes a screw, thus forming a ball screw. See the attached machine translation of JP 5-64056.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
